

1 Native Assignment Migration Fixture

Problem (p1): Explain the update rule for the training objective.

The objective combines a data term with a regularization term.

Example (e1): Evaluate the rule when the learning rate is 0.1.

Low-Resource Tip: Cache repeated feature vectors.

- Verify every intermediate value before submission.

```
for value in values:  
    total += value
```

$f(x) = x^2 + 3x$
(1)

where $x = 2$
and $y = 3$
